

MediRegs® ComplyTrack Contract & Relationship Manager™

Effectively monitor and manage all your contractual and arm's-length relationships across the enterprise.

Contract & Relationship Manager enables your organization to pro actively manage all contractor, and contract-related data in a secure, centralized location.

With *Contract & Relationship Manager* you can:

- Make sure that vendors, physicians, consultants, employees, and other users have the necessary credentials, permissions, and privileges in order to comply with all relevant regulations, policies, and standards
- Ensure that agreements and their related sub agreement termination and notice dates stay current and in sync
- Set up owners and reminders to provide accountability and no lapses in terms or conditions
- Create a single repository for contract documents and histories
- Clone form agreements to eliminate data entry errors
- Assimilate activities and events related to specific vendors
- Monitor compensation and flow of funds to staff and the organization to comply with ensure regulatory and internal-policy limits

Store all relationship information, whether it pertains to attending physicians, medical directors, representatives, boards, researchers, grant recipients, vendors, consultants, or volunteers. Simply create an individual record for each contact from the date of engagement to termination, including compensation and compliance information.

Access your data anywhere via the internet while maintaining strict data accessibility controls, allowing you to select users for added security.
