

The “one-stop-shop” compliance and reimbursement research portal.

RRS Regulatory Information

RRS Reimbursement and Coding Tools

“We love it. We are pushing the *Regulation & Reimbursement Suite* to the entire organization and in most areas, once they understand the power they now have, they want to sit through an entire class to learn how to use it. Vice Presidents and directors involved are learning where they need to start focusing on compliance issues rather than just guessing at possible problems to try to determine if there is a problem.”

Assistant Compliance Director,*
Hospital in the South

Used by more than 800 hospitals, dozens of law firms, leading consulting organizations and agencies such as CMS and the OIG, the *Regulation and Reimbursement Suite (RRS)* takes the great volume of compliance and reimbursement data available and compiles it all into one single location, with much better search capabilities. *RRS* speeds your compliance research, standardizes organizational resources, reduces redundant subscription costs and helps advance proper reimbursement practices. *RRS* helps you make sure you have the evidence you need to support your decisions.

RRS is a comprehensive, departmentally and topically organized portal that can be customized to match your specific content needs. It offers easy-to-use workspaces for performing targeted searches: CMS manual and transmittal searches; CFR/FR searches by citation or segment; Local and national coverage determinations.

RRS lets you bookmark key documents for easy retrieval, store searches as well as stay up-to-date thanks to three levels of news alerts: “Week in Review” general industry items, daily alerts customized to your preferences and topic-specific personal alerts you set to predefined search criteria. *RRS* also provides invaluable features such as easy-to-use and cross-linked archives plus robust tools and calculators for every compliance and billing need.

RRS Regulatory Information includes:

- Federal Legislation
 - Comprehensive Federal Register
